Business Continuity and Disaster Recovery

We offer comprehensive solutions to protect your business against potential interruptions and ensure business continuity. Our services are designed to safeguard your data and maintain accessibility for both local and global disaster scenarios.

Local Disaster Solutions

Includes measures to address potential disruptions in your internal infrastructure:

1. **Business-Critical Systems**: Developing tailored disaster scenarios for services within your local area network.

2. **Email Continuity**: Ensuring uninterrupted communication through design and implementation.

3. **Database Clustering**: Providing database clustering solutions for maintaining the continuity of critical data.

4. **Load Balancing**: Enabling seamless operations for web and application services.

5. **Virtualization Technologies**: Offering uninterrupted solutions for resource allocation and scaling.

6. **Advanced Data Backup**: Delivering secure, multi-point data storage solutions.

Global Disaster Solutions

Prepare your business for regional natural disasters with these offerings:
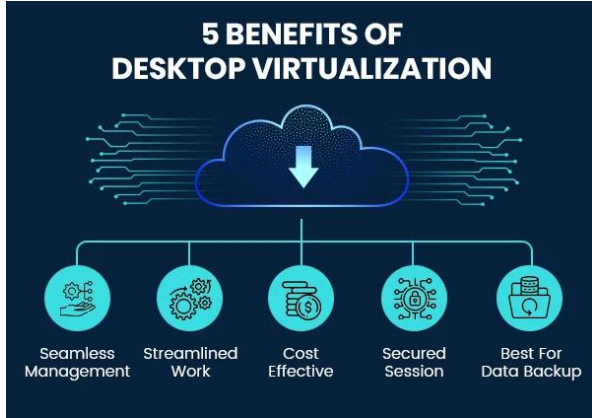

1. **Remote Site Replication**: Secure your data by keeping it synchronized between two locations.

2. **Disaster Recovery Center Solutions**: Backup and recovery options through secondary data centers.

3. **Virtualization Advantages**: Providing flexible, rapid recovery with server and desktop virtualization.

4. **Siztek Cloud**: Ensuring secure backups for constant data access.

Benefits

- Professional protection against disaster scenarios.

- Full compliance with legal regulations.

- Continuous business operations and secure data access.

- Ensuring your business is always prepared for risks.

Don't risk your business! Secure your operations with disaster recovery solutions tailored to your needs. For more details, contact us.

Virtualization and Consolidation Solutions

At Siztek, we streamline your complex systems with our virtualization and consolidation solutions, delivering maximum efficiency. We partner with leading providers such as VMware, Citrix, Red Hat, Dell, and Microsoft to propel your business into the future.

Server Virtualization

Server virtualization technologies allow you to utilize resources more efficiently while reducing operational overhead. Key advantages include:

1. **High Availability**: Ensuring uninterrupted operation of your critical applications and services.

2. **Rapid Recovery**: Quick restoration in the event of disruptions.

3. **Simplified Management**: Manage your IT infrastructure from a single platform.

4. **Resource Optimization**: Reduced energy consumption and cost savings.

5. **Easy Scalability**: Flexibility to adapt to your business's changing needs.

6. **Hyper-Converged Architecture**: Hardware-independent solutions with simple backup capabilities.

Endpoint Virtualization

We provide secure, flexible, and centralized solutions for the devices and applications your employees use. Benefits of endpoint virtualization include:
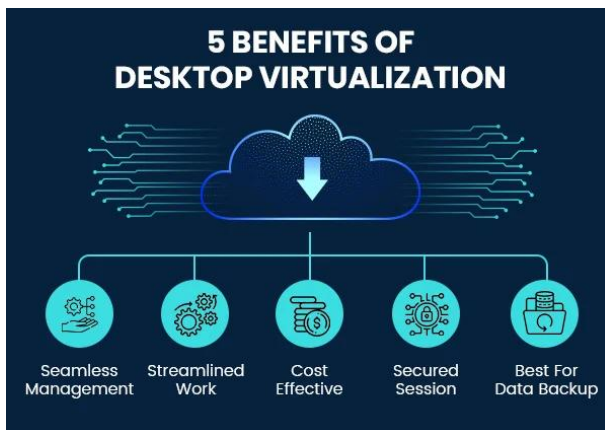

1. **Robust Security**: Protect critical data by centralizing it against cyber threats.

2. **Ease of Management**: Quickly update and deploy applications.

3. **BYOD Compatibility**: Offer employees a true desktop experience regardless of their device.

4. **Regulatory Compliance**: Manage data according to GDPR and ISO 27001 standards.

---

5. **Data Backup**: Ensure regular backup and auditing of critical user data.

Benefits

- Enhance flexibility and simplify management of your IT infrastructure.

- Reduce operational costs and save energy.

- Ensure the security of your data and continuity of your business.

- Prepare your business for the future with a modern technological infrastructure.

Simplify your IT infrastructure, gain management efficiency, and leverage the advantages of virtualization to grow your business! Contact us today for more information.

Enterprise Data Backup and Storage

At Siztek, we provide integrated backup and storage solutions that minimize the risk of data loss and securely store your information. With solutions from leading brands like **Symantec, Veeam, CA, Acronis, Dell/EMC, and QNAP,** we help you safeguard your business for the future.

Backup Solutions

Empower your business with innovative backup solutions that ensure data security and uninterrupted access:

1. **Fast and Reliable Disk Backup**: Optimized for virtualized environments.

2. **Deduplication Technologies**: Store more data for longer periods using less space.

3. **Virtual Tape Libraries**: Provide fast and secure backups without physical tapes.

4. **Disaster Recovery Solutions**: Backup strategies that ensure business continuity.

5. **Centralized Management**: Manage all backup operations from a single platform.

6. **Siztek Cloud**: Secondary and tertiary secure backup options.

Storage Solutions and Consolidation

Secure your data with high-capacity, performance-focused storage solutions:

1. **Next-Generation Storage Systems**: Options include Nearline SAS, SATA, or Flash/SSD-based systems.

2. **Intelligent Data Tiering**: Optimize disk space based on data type.

3. **File Sharing Protocols**: NAS systems supporting CIFS and NFS.

4. **Advanced Software Features**: Including snapshots, snap mirrors, and remote replication.

5. **SAN Systems**: Compatible with ISCSI, Fibre Channel, and FCoE connectivity.

6. **Centralized Management Software**: Efficiently manage SAN and storage systems.

Benefits

- Safely back up and easily access your data.

- Minimize risks with disaster recovery solutions that support business continuity.

- Boost operational efficiency with high-performance storage systems.

- Keep your data infrastructure under control with advanced management tools.

Protect your data and ensure operational continuity with Siztek's innovative backup and storage solutions. Contact us today for more details!

Enterprise Network Components and Security Solutions

At Siztek, we ensure your business continuity with advanced corporate network components and security solutions. Leveraging products from industry leaders like Cisco, Juniper, Dell, Ruckus, Ipswitch, and Arista Networks, we deliver tailored solutions to meet your business needs.

Wired/Wireless Network Components

Innovative solutions to optimize your network infrastructure:

1. **Core Switching Systems**: High-performance solutions supporting 10G and 40G.

2. **Data Center Switches**: Optimized devices for server connectivity.

3. **Intelligent Edge Switching**: Manageable L2 and L3 solutions.

4. **Wireless Network Infrastructure**: Strong network connections with wide bandwidth and outdoor support.

5. **Traffic Analysis and Monitoring**: Advanced solutions to enhance network performance.

6. **Wide Area Network Solutions**: Comprehensive support with routers and components.

Network and Internet Security

Protect your corporate networks from cyber threats:

1. **Next-Generation Firewalls**: Application-layer protection and deep packet inspection.

2. **VPN Solutions**: Secure remote connections with IPSEC and SSL VPN.

3. **Proxy and Content Filtering**: Control unwanted traffic on your network.

4. **DDOS Protection**: Prevent L7 application-layer attacks.

5. **Hot-Spot Security**: Advanced security for wireless networks.

6. **Zero-Day and Ransomware Protection**: Proactive measures to secure your network.

Benefits

- A robust and reliable network infrastructure for uninterrupted business continuity.

- Advanced security solutions to protect against cyber threats.

- Optimized network components to enhance performance and simplify management.

- Flexible solutions for both wired and wireless networks.

"Strengthen your network infrastructure and protect your business from cyber threats with Siztek's innovative network solutions. Contact us today for more information"

Microsoft Enterprise Products and Office 365

Flexibility and efficiency in the modern business world are made possible with the right software solutions. At Siztek, we provide scalable and innovative services tailored to your needs with Microsoft's enterprise products and Office 365 solutions. As a Microsoft Datacenter and Small Business partner, we support businesses of all sizes.

Microsoft Licensing and Solution Consultancy

We support your business processes with solutions tailored to your requirements, giving you a competitive edge:

1. **Microsoft Licensing Review**: Assessment and recommendations for efficient licensing.

2. **Tailored Solutions**: Positioning the right Microsoft products to meet your business needs.

3. **Productivity Tools**: Creating user-friendly, efficient work environments with Microsoft Office and Office 365.

Custom Solutions

Innovative services designed to address diverse needs:

1. **Mobility and Security**: Secure access solutions for mobile devices and remote workers.

2. **Unified Communication**: Seamless communication with Microsoft Exchange and Lync products.

3. **System Management**: Simplify IT infrastructure management with Microsoft System Center.

4. **SPLA Licensing**: Utilize Microsoft products without upfront investment through special agreements.

5. **Cloud Solutions**: Secure, flexible, and scalable services with Microsoft Azure and Intune.

Benefits

- Optimize costs with accurate licensing.

- Ensure secure and compliant infrastructures with robust solutions.

- Enable mobility with flexible work environments.

- Increase business productivity with an integrated software ecosystem.

"Grow your business and gain a competitive advantage with Microsoft solutions! Discover the solutions that best fit your needs with Siztek's expertise"

Enterprise Hardware Solutions

At Siztek, we collaborate with leading brands such as **Dell/EMC, HPE, Lenovo, and Huawei** to deliver performance-driven, cost-efficient hardware solutions tailored to your business needs.

Data Center and Server Solutions

Modernize your business's data center infrastructure with innovative solutions:

1. **Blade Server Architecture**: High performance and capacity in a compact form.

2. **Rack & Tower Servers**: Easy-to-manage solutions equipped with Intel's latest technology.

Storage Solutions

Securely store your data in high-performance environments:

1. **Fiber Channel and ISCSI Connections**: Flexible solutions adaptable to various environments.

2. **Disk and Tape-Based Backup**: Maximize efficiency with deduplication and compression technologies.

3. **All-Flash and NVMe Storage Systems**: Combining speed, security, and flexibility.

Network Solutions and Workstations

Scalable solutions for businesses of all sizes:

1. **Smart Network Devices**: Wired and wireless solutions for office and data centers.

2. **Mobile and Desktop Workstations**: Optimized devices for demanding design and engineering applications.

3. **Thin Client Systems**: Ideal for virtualization and durability.

4. **Portable Devices**: Enhance mobility with sleek designs and advanced security features.

Benefits

- High-performance hardware tailored to your business processes.

- Modern IT infrastructure supporting business continuity.

- Reliable and durable systems for long-term use.

- Efficient, flexible, and easily manageable technological infrastructure.

"Meet your business's IT needs with cutting-edge technology provided by Siztek. Optimize your technology investments with our expertise"

Bulk Email Delivery Solutions

Our company provides innovative solutions powered by Microsoft technologies, including Windows Server, IIS, SQL Server, and .NET. We design secure, efficient email management services tailored to your organization's digital communication needs.

Custom Critical Email Delivery Solutions

Specialized services for secure, fast, and efficient handling of critical email deliveries:

1. **Guaranteed Delivery**: Ensuring the reliability of bulk email transmissions and minimizing the risk of being flagged as spam.

2. **Critical Document Delivery**: Secure transmission of invoices, receipts, and other business-critical documents.

3. **Whitelist/Blacklist Management**: Monitoring and maintaining secure sending practices.

4. **SMTP Log Analysis and Reporting**: Monitoring and optimizing delivery performance.

Campaign and Marketing Solutions

Innovative solutions to enhance your marketing campaigns and customer engagement:

1. **Low-SPAM Risk Bulk Email**: Sending bulk emails from secure on-premises or shared hosting platforms.

2. **Customer List Management**: Automated correction and seamless upload of mailing lists.

3. **Campaign Tracking**: Monitoring user behavior after email delivery and generating detailed reports.

4. **Content Optimization**: Customizing email content to maximize impact on your target audience.

Benefits

- Reliable and fast delivery of business-critical emails.

- Maximized engagement and conversion rates in marketing campaigns.

- Reduced SPAM risks to safeguard brand reputation.

- Performance optimization with advanced monitoring and reporting tools.

"Speed up your processes and strengthen your marketing strategies with our bulk email solutions! Contact us today for more information."

Next-Generation Security Solutions

At Siztek, we provide advanced security solutions to protect your organization's data and proactively defend against cyber threats. Our next-generation security technologies keep your data and infrastructure safe from any attack.

Application Layer Security Solutions

Ideal for organizations processing data online, such as e-commerce and finance sectors:

1. **Code-Level Monitoring**: Continuous surveillance of application code changes.

2. **Anomaly Detection**: Identifying and addressing unusual activities proactively.

3. **Web Application Security**: Enhanced application protection with products like Citrix Netscaler, F5, and Fortinet.

XDR Solutions (Extended Threat Detection and Response)

Providing visibility in complex IT infrastructures and enabling rapid action against threats:

1. **End-to-End Protection**: Comprehensive threat detection across all networks and devices.

2. **Anomaly Management**: Real-time alerts and automated responses to potential threats.

3. **Proactive Security**: Optimized protection with leading products like SentinelOne and Palo Alto.

Secure Backup Solutions

Ensure data integrity with secure storage and backup:

1. **Data Immutability**: Protecting stored data from unauthorized access.

2. **Bot and Malware Control**: Ensuring clean and secure backups.

3. **Backup Operation Security**: Safeguarding backup processes from external threats.

Endpoint Security Solutions

Maintain control over your employees' devices and mitigate potential threats:

1. **Identity Verification**: Enhance security with multi-factor authentication and password management.

2. **Data Loss Prevention**: Prevent unauthorized sharing of critical documents.

3. **Behavior Analysis**: Monitor user activities on the network to detect potential risks.

Benefits

- Comprehensive security solutions for your data and systems.

- Proactive threat detection and response to minimize risks.

- Compliance with regulations and legal requirements.

- Stay ahead of cyber threats with innovative security solutions.

"Secure your business and prepare for the future with Siztek's next-generation security solutions. Contact us today to take your security to the next level"

Business Partners

As Siztek Bilişim, our goal is to provide our valued customers with the highest quality and most innovative solutions. To achieve this, we establish strong partnerships with leading technology manufacturers in Turkey and around the world, bringing the most up-to-date and reliable products to your service. With our expert team and wide range of solutions, we work to deliver the most suitable technology to meet your needs.

Here are some of our key partners:
